Thickness	12/22mm <small>(+/-1mm)</small>
Model	27mm slat width, 13mm gap
Colour <small>(refer to chart below)</small>	See standard finishing options below. <small>Custom options available</small>
NRC	0.80 <small>50mm cavity</small>

HPL

These are the standard HPL (high pressure laminate) options which are usually in stock for shorter lead times. Many more are available and we can try to match finishes. The standard thickness is 0.9mm and these are highly scratch resistant, UV resistant, and low maintenance finishes.
